

Transmissible Spongiform Encephalopathy (BSE/TSE) Certification

Lubrizon’s food grade carbomers (E 1210) listed below have been manufactured from synthetic materials and do not contain any material of animal origin including TSE-relevant species. No animal products are used at any point in the processing or handling of this product and if applicable, risk management measures consistent with the “*Note for guidance on minimizing the risk of transmitting animal spongiform encephalopathy agents via human and veterinary medicinal products*” (EMA/410/01 rev.3) (2011/C 73/01) are implemented.

Based on our understanding of the manufacturing process and raw materials, the risk of transmitting TSE with use of these products is therefore minimal.

Carbopol® 71G
Carbopol® 971P
Carbopol® 974P
